Subject: Support of Bill HB5104

Dear State of Michigan,

Hello. I live in WA state and have twins with a rare and catastrophic form of epilepsy called Dravet Syndrome. They are currently being treated with high CBD medical cannabis with amazing results that pharmacological drugs have been unable to provide us. Going off this treatment is NOT an option for our twins' quality of life. I am from Indiana originally and desperately want to move closer to home. Since Indiana is not a legal MMJ state, our closest option is Michigan. Please pass Bill HB5104 as it was introduced! The medical cannabis we give our children is in an oil form and does not get them high. It gives them their life! Please support us in helping our suffering children attain the highest quality of life possible!!

Thank you for your time,

~Amber Burn, RN, BSN
Mother of Twins with Dravet
